

Pattern Acryl

Self-curing modelling/carving resin for building up telescopes, shear distributors as well as super- and supra-structures in the brush technique.

Features	Benefits
polymerizes within a very short time (4 min.)	very fast and simple processing
extremely low shrinkage	exact reproduction of detail
burns out residue-free	smooth surface of the cast
very fine-grained polymer	quick swelling
high transparency	good control of layer thickness during modulation and proessing

Color: red

Packaging sizes: 100 g can and 100 ml bottle

Technical Data:

E-Modul: 1950MPa
Flexural strength: 98 MPa
Vickers hardness: 785 Mpa
Shrinkage: 0,38%
Storage: 10°C-25°C
